DETAILED ACTION

Receipt of applicants' amendments, declaration, and remarks submitted October 7, 2002 is acknowledged.

Claim Rejections 35 U.S.C. § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cook et al. (US 5,554,646 of record) in view of applicants' disclosure at page 11, line 13-25 in the specification, Cain et al. (WO 97/18320, IDS April 13, 2000), Chin et al. (IDS, November 23, 1999) and Baltes et al. (US Patent 3,162,658, IDS May 23, 1999) for reasons set forth in the prior office action.

Response to the Arguments

3. The declaration under 37 CFR 1.132 filed October 7, 2002 is insufficient to overcome the rejection of claims 1-6 and 8 based upon Cook et al. Cain et al. as set forth in the last Office action because: the declaration fails to establish the fact that the conjugated linoleic acid disclosed by Cook or Cain as recited in the prior office action containing more than 2% of the isomers identified in the claim herein. Particularly, applicant generated data, proffered to obviate prior art teachings, lacks the probative force accorded data generated by independent, disinterested parties. It is well settled patent law "that it is not a difficult matter to carry out a process in such a fashion that it will not be successful and, therefore, the failures of

Art Unit: 1617

experimenters who have no interest in succeeding should not be accorded great weight" In re Michalek, 74 USPQ 108, at 109 citing Bullard Company et al v. Coe, 147 F.2d. 568, 64 USPQ 359.

4. Further, there is no established relationship between the commercial products analyzed by Yurawecz and those disclosed by Cook or Cain.

5. The declaration and remarks establish the criticality of the limitation of isomers herein identified. But this fact alone is not sufficient to overcome the rejection set forth in the prior office action since the conjugated linoleic acid or derivatives disclosed by Cook or Cain meet such limitation.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
